Manufacturing Engineer Houston, Texas

Packers Plus is the pioneer of open hole, multi-stage horizontal fracturing and we provide technology-based solutions to the oil and gas industry around the world. We are looking for a **Manufacturing Engineer** in our Houston, Texas office.

Primary Role

- The Manufacturing Engineer is responsible for designing and developing tools and ensuring improvements are completed in a timely manner as well as ensuring products are high quality.
- This role is also responsible for providing assistance with any issues that arise and ensuring projects are completed accurately and meet standards.

Key Tasks and Responsibilities

- Maintain the quality control of the product lines and ensure standards are met
- Update drawing designs with any design improvements necessary
- Provide assistance with any functions that will help improve the assembly process including designing and creating assembly, shop and quality control tools
- Provide engineering guidance to manufacturing personnel for all areas of manufacturing facility.
- Research technologies to remain aware of the changes in the industry and ensure designs are moving the company forward.
- Conduct design and technical drawing activities with respect to shop requirements, meeting technical standards.
- Place equipment orders, assess and test tools, when required to do so.
- Handle any issues that arise as necessary to ensure projects are completed in a timely manner and efficiency is maintained
- Complete quick turnaround designs as requested
- Manage projects and ensure completion is accurate and on schedule
- Maintain cleanliness of the work space in order to ensure a safe work environment

Educational, Physical and Safety Requirements

- Post Secondary Degree in Engineering (Mechanical or Manufacturing)
- Significant use of computer monitor, keyboard and mouse
- Sit at a desk for extended periods

Competencies, Skills and Experience

- Minimum of 2-3 years experience with Design in a Manufacturing environment and/or Oilfield Tool design to meet standards and maintain customer satisfaction
- Previous Oil and Gas experience an asset
- Proficiency with CAD Programs, preferably Solid Works, data management program preferably EPDM and Microsoft Office products including Word, Excel and Outlook
- Basic understanding of industry and technology changes and ability to remain informed to ensure product designs are up-to-date
- Strong verbal and written communication skills required
